

深水埗

深水埗
SHAM SHUI PO

南昌街

深水埗是全港人口密度最高，人口老化最嚴重的地區，造就了劏房、棺材房以至籠屋的出現，部分居所生活環境惡劣。由於地段便宜令商業活動發達，所以成為電子產品、服裝配飾、古玩玉石等多方面批發集中地。

Sham Shui Po is the highest population density and most aging population area in Hong Kong. This situation caused the emergence of sub-divided units, coffin-sized units, and even cage homes, in which the living environments are poor. However, business activities flourish in this more affordable district where becomes the wholesale center for electronic products, clothing accessories, antiques, and jade.
